Mini-Group Assignment

Pick one outdated software product and create a modernisation concept using the canvas.

Example: Any outdated software products that were widely used. (eg: Skype is a good example but do not take that since it was already used as a demo in the workshop).

1. Modernisation perspective

● **Purpose:** Align on what modernisation actually means for this product.

Question	If this product was built today, what would be different?

Mobile first design and minimalistic interface
